1 Introducing the Daycare Database

1.1 Who Should Use This Application

Staff who work at the daycare must use this application. The goal of this application is to be able to monitor everything controlled online with no issues. Every child's information including their individual info, payments, medical history, and parent information should be there and completely accurate.

1.2 Who Should Use this Guide

This guide is intended for all staff members of the daycare center:

- Staff: Learn how to login to their account, navigate the site, add/edit childrens medical info, billing, parent info, and staff info
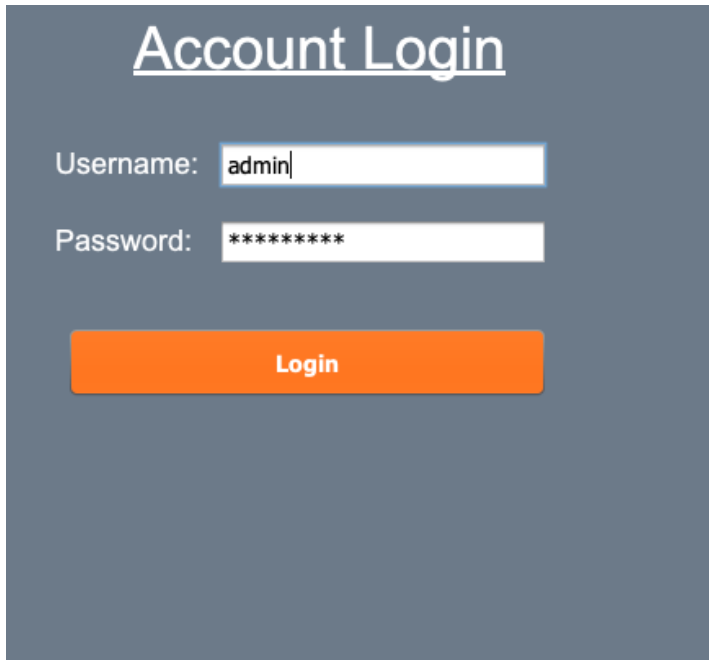

2 Key Features

2.1 Features for Staff

The following are key system functions available to staff

who work at the camp:

- Login with username and password
- Input, edit and remove children from daycare
- Add parents and their information
- Add medical information for children if needed

3 Staff user tour
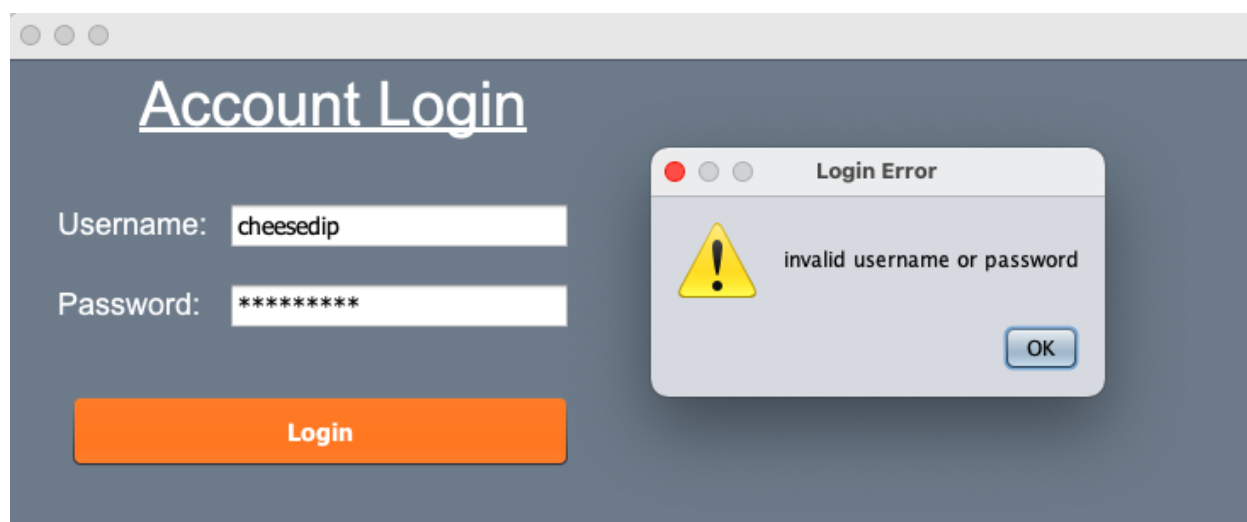

3.1 Login

When the application is launched, users will see a login window with a username and password input field. You must enter both then click login. (username and password = admin).

3.2 Incorrect Login

If an invalid username and/or password is inputted, a login error message will appear saying invalid username or password.

3.3 Home Page

The home page consists of 5 categories, Bill, Medical, Child, Employee, and Parent.

When you hover over the category, a navy blue color appears on the category being hovered on.

The user can simply access the pages by clicking on them.

3.4 Medical

Staff can add children to different medical lists by inputting the child's ID and name.
